1. Execute "hw7_model1.ipynb", "hw7_model2.ipynb", and "hw7_model3.ipynb", which will generate three .csv file "result_1.csv", "result_2.csv", and "result_3.csv", respectively.
2. Put "result_1.csv", "result_2.csv", "result_3.csv", and "ensemble.py" in the same folder and execute "ensemble.py", which will generate "result_ensemble.csv" as final result.
